1 Flowchart: Timeline of Aeltas

1.1 Notes and Legend

- **Color Legend:**
 - Light Gray: Main Foundings + Era Intros
 - Blue: Significant Events
 - Yellow: Technological or Magical Innovation
 - Red: Major Conflicts or Wars
- **Flowchart Description:**
 - This flowchart follows a clear timeline of the most important events that shaped the world of **Aeltas** and distributes them between four canonical eras: *Age of Dawn*, *Rune Age*, *Magi-Tech Age*, and *Starlight Era*.
 - Every chart node of the game history is one moment (for example, event, battle) discovered in a certain part of lore.
 - There are arrows pointing to each line on the timeline, so you can follow an event linearly down these lines and see how societies, technologies, magics, or characters change (note that reading vertically to stay within one era is read non-linearly).
 - Blocks are color-coded to identify various types of events and their relevance in the world.

1.2 Source Attribution

- All historical events, characters, and in-world developments are based strictly on the official source material: *Aeltas Fact Table (Fan Peng 2025)*, as well as an additional lore essay named *Aeltas World Narrative*.
 - The visual timeline was created and rendered in *RStudio* with the **DiagrammeR** package using *grViz* syntax within an RMarkdown environment.
 - All flowchart data has been aligned to the canonical internal logic of the Aeltas universe and structured in a way to fulfill the format, presentation, and detail requirements of Assignment 3.
-
